

# RONEN WEINSTEIN

CTO / VP R&D | Leading Scalable SaaS & AI Platforms | Global Engineering Leadership |  
Cloud Architecture, Microservices & Data-Driven Innovation  
054-8315497 • gwronen@gmail.com • <https://www.linkedin.com/in/ronen-weinstein/>

## Summary

Technology Executive (CTO / VP R&D) with 15+ years of experience leading scalable SaaS, AI, and data-driven platforms across fintech, health tech, and automotive sectors. Proven track record in building high-performing engineering teams, modernizing architecture, implementing tools, methodologies and driving innovation from concept to production. Transparent, communication-focused leader known for fostering accountability, alignment, and growth.

Interested in CTO, VP R&D, or Director roles in growing technology companies or startups, where I can integrate business strategy, customer needs, and technological solutions.

## KEY ACHIEVEMENTS

### AI Product Leadership

increased AI precision by 166% by setting a data driven working process

### Global R&D Scale-Up

Expanded R&D and led 50+ global engineers, including offshore.

### High-Load Stability

Delivered a high-load SaaS system upgrade within six months while maintaining full legacy support.

### Multi-Product SaaS Ownership

Managed 15+ products serving 1,200 system users and 2M customers with 24/7 reliability.

### Transparent, Purpose-Driven

Built alignment and ownership by explaining the "why" and maintaining open communication within teams.

### Executive Technology Leadership

Defined and executed R&D strategy, aligning technology, product, and business goals across the organization.

## TECHNICAL SKILLS

### Software Development:

SaaS · Web · Microservices · Architectures · API · Design · QA Automation · Node · React · .NET · JavaScript · Typescript · AI · Development Process

Data & AI: AI · Machine Learning · Data Engineering · BI · DWH · PostgreSQL · MSSQL · MySQL · MongoDB · Redis · RabbitMQ

Cloud & Infrastructure: AWS · Google Cloud · CI/CD · GitHub · TFS

## PROFESSIONAL EXPERIENCE

### YONALINK

CTO | Managed 10+ employees

2024 - Present

AI-driven data Management system for clinical trials.

- Led all R&D activities, cloud operations, roadmap planning, and organizational goals.
- Implemented development methodologies and tools across departments.
- Managed team leaders, tech leads, developers, QA, DevOps, DBA, BI, Product, and AI teams, including offshore groups.
